

LeagueHangar.com Privacy Notice

Pre-Release Candidate v1.1 | Effective August 23, 2026

Operator: Hums Along AI | O'Fallon, Missouri, United States

Contact: support.humsalongai@gmail.com

Plain-language summary *(for convenience only; the full notice below controls)*

LeagueHangar.com is designed to collect as little information as practical. The site does not intentionally set first-party cookies, run analytics or advertising trackers, or create user accounts. Cloudflare processes ordinary technical request data needed to deliver and protect the site. If you email Hums Along AI, we receive the email address and message you send. Wingman itself is local-first and does not send background telemetry to Hums Along AI; information is sent only when you deliberately use a feature that requires a connection or choose to submit feedback or diagnostics.

1. Who we are

LeagueHangar.com is operated by Hums Along AI, based in O'Fallon, Missouri, United States. Wingman is owned and operated by Hums Along AI.

Privacy and support questions may be sent to support.humsalongai@gmail.com.

2. What the LeagueHangar site collects

The LeagueHangar.com site is intentionally minimal. It does not intentionally place first-party cookies, run analytics or advertising services, use behavioral advertising, create user profiles, or embed third-party advertising trackers.

The site does not require a LeagueHangar user account. Information needed to deliver the site over the Internet is processed by our infrastructure provider as described below.

3. Website infrastructure and technical request data

LeagueHangar.com is served through Cloudflare, Inc. When a visitor requests a page or file, Cloudflare may process technical request information such as an IP address, traffic-routing information, browser or system information, request timestamps, and security-related information in order to deliver, secure, and defend the site.

Hums Along AI does not use this infrastructure to run visitor analytics or behavioral advertising. Cloudflare processes information under its own privacy terms and service arrangements.

4. Email and support correspondence

Email sent to support.humsalongai@gmail.com is handled through Google's Gmail service and a mailbox controlled by Hums Along AI. If you email us, we receive the email address you use, the contents of your message, and any files or other information you choose to include.

We use support correspondence to respond to you, investigate issues, maintain appropriate support or legal records, protect Wingman and LeagueHangar.com, and meet legal obligations. We keep such correspondence only as long as reasonably necessary for those purposes.

5. Beta access codes

During a private beta, LeagueHangar.com may ask for a shared access code before allowing a Wingman download. Entering a beta access code does not create a LeagueHangar user account, and the access code is not intended to identify a particular person.

As with any other request to the site, ordinary technical request information may be processed by Cloudflare when the code is submitted.

6. Downloads and the Wingman software

Downloading Wingman causes the ordinary technical request data associated with a file download to be processed as described in Section 3.

After installation, Wingman is designed to operate locally and to work without continuous Internet access. Wingman does not send background usage telemetry or analytics to Hums Along AI. Routine league data, draft records, preferences, and fantasy-platform credentials are not transmitted to Hums Along AI merely because you use Wingman.

If you deliberately enable a supported online or third-party integration, that feature may communicate with the applicable service as needed to perform the function you requested. If you choose to submit feedback, screenshots, logs, or diagnostic information to Hums Along AI, the submission is user-initiated and should be reviewable before it is sent. The Wingman End User License Agreement and Wingman Privacy terms govern the software itself.

7. Purchases

Purchases are not currently offered through LeagueHangar.com. Before paid purchases open, this notice will be updated to identify the payment processor and any additional information that Hums Along AI receives in connection with a purchase.

Our current plan is to use a third-party payment processor so that Hums Along AI does not receive or store full payment-card numbers.

8. Children

LeagueHangar.com and Wingman are not directed to children under 13, and Hums Along AI does not knowingly request or collect personal information from children under 13 through the site.

If you believe a child under 13 has sent personal information to Hums Along AI, contact support.humsalongai@gmail.com so that we can review the situation and take appropriate steps.

9. Your privacy rights

Depending on where you live, applicable law may give you rights relating to personal information, such as rights to request access, correction, deletion, or information about certain processing.

Because LeagueHangar.com is intentionally designed to retain little or no visitor information itself, Hums Along AI may have little or no site-level personal information on which to act. Requests may be sent to support.humsalongai@gmail.com. We may ask for information reasonably necessary to understand and, where required, verify a request.

10. Changes to this notice

We will post an updated version of this Privacy Notice at LeagueHangar.com when it changes and will identify the effective date of the current version.

If a material change affects how Wingman or LeagueHangar.com handles personal information, we will provide notice appropriate to the change. Changes that affect Wingman users will also be handled consistently with the change provisions of the applicable Wingman End User License Agreement.
